

Administration in the Absence of Policy or Procedure

The purpose of Board Policies is primarily to give direction to the chief school administrator and to inform the public of the Board's position on matters relating to the operation of the public school system. In view of the complexities of the many facets of school administration, the Board recognizes that at times decisions may need to be made on matters of importance which are not covered by existing policies. The Board, therefore, in the absence of a written policy covering the problem at hand, gives the Superintendent full authority to take such actions and to make such decisions as he may deem necessary to resolve the problem and to report the action to the Board at its next meeting.
