

LIBRARY INFORMATION AND TECHNOLOGY PROGRAMS

The purpose of the Colton School District library information and technology programs is to support student mastery of the essential academic learning requirements and state standards in all subject areas. The programs will provide a broad, flexible array of services, resources and instruction.

The superintendent will establish procedures for the selection of materials with the understanding that media literacy resources will consist of a balance of sources and perspectives. Citizens who wish to express a concern about specific material included in the collection may do so according to the procedures outlined in Procedure 2021P, with the understanding that the criteria and rationale for reconsideration of library resources differs from the criteria and rationale for reconsideration of classroom/curricular instructional materials.
